APPLIED FABRICATORS

RAPID. RESPONSIVE. RELIABLE.

EDGE METAL SYSTEMS

AppliedFabricators.com

OUR STORY

40+ YEARS OF FABRICATION, BUILT FOR TODAY'S STANDARDS.

Founded in 1984 by Bob and Julie Reeve, AFAB remains family-owned and operated today under second-generation owner Brandon Reeve.

From our Greenfield, IN facility, we've built our reputation on precision fabrication, responsive service and the flexibility to keep up with our customers' changing needs.

That means continuing to invest in performance testing and engineering, including an expanded portfolio of FM Approved edge metal systems built for the demands of commercial roofing.

>> FASCIA

Durable, continuous protection for the roof edge.

>> COPING

Weathertight protection for parapet walls.

>> WATER MANAGEMENT

Gutters, downspouts & scuppers built to perform.

COLOR OPTIONS

A COLOR FOR EVERY PROJECT

Seven of our most-stocked colors are featured at the center, surrounded by matches to commonly specified colors from major manufacturers. Beyond these, we can also custom match virtually any color to meet your project and aesthetic needs.

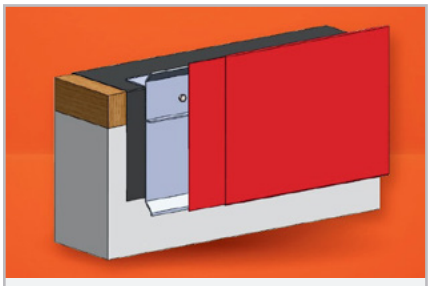

NOTE: Colors shown are representations only and may vary from actual painted metal due to the printing process. Color availability may vary by material, gauge and finish.

Please contact us at Quotes@AppliedFabricators.com for current availability, technical data, or additional product information.

NEW FM APPROVED OFFERING

Our expanded portfolio includes nine FM Approved fascia, coping and water management systems, tested to applicable ANSI/SPRI/FM 4435/ES-1 and ANSI/SPRI/GT-1 standards — giving contractors and specifiers more approved options across the roof edge.
